

CRAZY STRIKES PROGRESSIVE JACKPOT LEAGUE RULES

1. Bowlers must use the highest average from any bowling center, either current average, last year's final average, summer league average, or first half average. If current league average is higher after 12 games of new season, you must use current average. New bowlers must bowl at least 12 games to establish an average. Management may not allow new average if sandbagging is suspected!
2. Any bowler whose average is over 210 in any league is not eligible to bowl in the jackpot.
3. The jackpot shall accumulate daily with the winner receiving 70% of the jackpot. 30% of the jackpot will go back into the jackpot.
4. All the money is put directly into the jackpot. The bowling center keeps nothing.
5. When a bowler breaks the jackpot, the prize will be paid prior to bowling the following week.
6. If two or more people hit the jackpot on the same day, the money will be split evenly.
7. **The \$2.00 entry fee must be paid by the start of the 2nd frame of the first game.**
8. It is the bowler's responsibility to make sure they are entered into the correct division, not the counter person.
9. The bowling center management reserves the right to settle all disputes. By paying your entry fee you agree to accept all these rules.
10. ***All score corrections must be made to the counter before the correction takes place. Any score correction not reported and noted by center employee may void all winnings.***
